College president, writer, and public servant, you have advanced the cause of the liberal arts and of higher education with your unsurpassed sense of mission, your keen appreciation for the rare and irreplaceable, and your dedication to humane values.

You achieved success early in your first career, journalism, serving as Washington editor and national affairs editor for the *Reporter Magazine*. Later, you were to become vice-chairman of England's oldest weekly newspaper, *The Observer*. As a journalist, you were recognized with major distinctions, including the Front Page Award and the George Polk Memorial Award.

Beginning in 1964, you performed a signal service to the advancement of education in this nation as special assistant to President Lyndon B. Johnson. You helped in this capacity to launch the Higher Education Act, the Elementary and Secondary Education Act, and the International Education Act, as well as the Teachers Corps and the Public Broadcasting Commission. Later you were associated as lecturer and professor with several of our most distinguished universities, and you became Senior Fellow, Founding Fellow, and Trustee of the Aspen Institute for Humanistic Studies.

It was admirable and fitting that in 1982, the nation's tenth oldest chartered college, Washington College in Chestertown, should have sought you out as president. Your achievements in helping the college to flourish as perhaps never before are well known and furnish convincing evidence of your superb leadership and of this society's enduring need for the independent liberal arts institution.

Douglass Cater, in recognition of your lasting contributions nationally to the promotion of education, and in appreciation of your consistent championing of independent higher education within this state and nation, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Master builder, alumnus, and long-time friend and supporter of this institution, your creative contributions to the construction industry have helped change the face of the state and nation, while your generosity has enriched and preserved valuable elements of Baltimore's cultural heritage.

You joined the Whiting-Turner Contracting Company in 1938 as a 19-year-old engineering graduate of Johns Hopkins. Since 1955, you have been its president, and during this time it has become the largest construction firm in Maryland.

Under your leadership, Whiting-Turner has built some of the area's most distinctive landmarks, including the second Chesapeake Bay Bridge, nine sections of Interstate Route 95, office buildings, shopping malls, pioneering turnkey housing for the elderly in Washington, D.C., Harborplace in Baltimore, the National Aquarium, and the Meyerhoff Symphony Hall. The firm's many major construction projects for this university include the Space Telescope Science Institute, the Montgomery County Center, and the just-dedicated Bloomberg Center for Physics and Astronomy, the largest building on the Homewood campus.

You played a key role in saving the Baltimore Symphony Orchestra during a crippling labor dispute; bought and gave to the city the historic Mount Vernon mansion known as the Thomas-Jencks-Gladding House, now called the Hackerman House; and aided such other Baltimore institutions as the Walters Art Gallery, Peale Museum, Peabody Conservatory, and Maryland Historical Society. Your contributions to Johns Hopkins have included the establishment of chairs at both the University and Hospital, membership on the Board of Trustees, establishment of the Hackerman-Patz House for Oncology Patients, and chairmanship of the ad hoc committee which oversaw the opening of the G.W.C. Whiting School of Engineering.

Willard Hackerman, in recognition of your lifetime of distinguished service and extraordinary generosity to The Johns Hopkins Institutions and to our community, The Johns Hopkins University gratefully confers upon you the degree of Doctor of Humane Letters, *honoris causa*.

Thirty-second First Lady of the United States, your life has symbolized public service and dedication to humanitarian causes of the highest order.

Known since infancy to family and friends as Lady Bird, you graduated from the University of Texas in 1934 and the following year married Lyndon Baines Johnson, then executive secretary to a Texas Congressman. You played a key role in your husband's career through twenty-four years in Congress. As wife of the Vice President and later President, you traveled with him to more than thirty countries, representing the United States, while fulfilling with distinctive graciousness the myriad political and social engagements that prominence in public life required of you.

Other duties, pursued with equal devotion, arose from your own deep concern for human, cultural, and environmental matters. During your husband's presidency, you were an active member of the Society for a More Beautiful National Capital and a board member of the American Conservation

Association. You have also championed the work of the National Park Service and have long been a Trustee of the National Geographic Society. In 1982, you created the National Wildflower Research Center near Austin, Texas. Today, you head a highly successful broadcasting operation in Austin, but much of your time and energy goes in support of the activities of the Lyndon B. Johnson Presidential Library and the Lyndon B. Johnson School of Public Affairs on the campus of the University of Texas at Austin.

For these and other achievements, you have received the Eleanor Roosevelt Award of the Women's National Press Club, the B'nai B'rith Humanitarian Award, the Medal of Freedom, presented by President Gerald Ford in 1977, and the Congressional Gold Medal in 1988.

Claudia Taylor Johnson, in recognition of your extraordinary contributions to the cultural and aesthetic well-being of our country, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Business leader, philanthropist, and faithful alumnus and friend, you have reflected great credit upon this institution for more than fifty years, beginning in 1936, when you graduated from the School of Arts and Sciences with the Carlyle Barton Award as the outstanding member of your class. In that same year, you became first lieutenant in the Organized Reserve of the U.S. Army, serving until 1942, when you volunteered for the American Field Service and were attached to the British Eighth Army as a first lieutenant. During the course of service in Africa, India, and Burma, you received citations for valor from two foreign governments.

In 1955, you were elected president and chief executive officer of Mead Johnson & Company, becoming the youngest CEO at that time in the pharmaceutical industry. In 1967 your company merged with Bristol-Myers, and you became a member of the board, a member of the executive committee, and senior vice president of that company. For more than two decades, you have devoted your energies to D. Mead Johnson Enterprises, Inc., a venture capital company dedicated to the support of innovative ideas and products. You also serve as president of the D. Mead Johnson Foundation.

You have twice given substantial amounts of your time to Johns Hopkins as a member of the Board of Trustees, first from 1953 to 1955 and then from 1968 to 1976. You served as vice chairman of the Hopkins Hundreds Campaign from 1973 to 1976, and the D. Mead Johnson Chair in Chemistry reflects your extraordinary generosity as well as your abiding interest in natural and medical sciences. You have also served as a wise and trusted friend of two presidents of this university.

D. Mead Johnson, in grateful recognition of your generous gifts of time, service, and support, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Peerless leader in the Baltimore business community, champion of your native city, philanthropist, and alumnus and devoted friend, your life and work have vastly enriched the quality of life for the people of Baltimore and beyond.

Following service in the Coast Guard during World War II, you headed your family's clothing manufacturing business. You then joined the Hecht Company, where your vision made the firm a leader in the postwar expansion of retailing into suburban areas. You eventually became president and led a merger with The May Company Department Stores to create the largest retailing operation in the region. In 1974, you retired from that brilliant business career and joined Mercantile-Safe Deposit and Trust Company, from which you retired as chairman of the executive committee in 1985.

You and Ryda, your wife of more than 50 years, have given generously of your time and talent toward the revitalization of the cities of Baltimore and Washington, serving on numerous commissions, committees, and boards dealing with preservation and community redevelopment. A nearby example of your generosity is the Ryda and Robert H. Levi Sculpture Garden at the Baltimore Museum of Art. Scarcely a single facet of life in this region has not benefited from your dedication and assistance, and from your shrewd and decisive intelligence.

Your service to Johns Hopkins has few parallels. You have served on the boards of both the University and Hospital. You have been vice chairman of the Johns Hopkins Fund, chairman of the Committee on Investments, chairman of the joint trustees meeting which launched the Hopkins Hundreds Campaign, and chairman of the Joint Trustee Development Committee which laid the groundwork for the Campaign for Johns Hopkins. The Levi Building of the biology complex is a lasting tribute to the extraordinary commitment you and Ryda have made to the University over the years. You have indeed been a Trustee *par excellence*.

Robert H. Levi, in recognition of your distinguished career and your unwavering commitment to this institution, and with deep gratitude and affection, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Conductor, musicologist, and artist, your name is synonymous with music in America, and your legacy includes transporting that joy to all corners of the globe.

A conductor of major orchestras in this country and abroad, your distinguished career began in New York where you prepared choruses for such renowned conductors as Arturo Toscanini and Bruno Walter. In 1949, you formed the famed Robert Shaw Chorale and Orchestra which, over the next seventeen years, was sent as this government's musical emissary to thirty countries in Europe, the Middle East, and Latin America.

Your contributions as music director of the San Diego Symphony Orchestra and associate conductor of the Cleveland Orchestra, where you worked with George Szell for ten years, led you to the post of music director for the Atlanta Symphony Orchestra from 1967 to 1988. Under your baton this became one of the great American orchestras.

As recently as the summer of 1988, you inaugurated a music festival in France that enchanted international audiences and critics alike. Your career has been studded with awards, including twelve Grammys and other top recording prizes, the first Guggenheim Fellowship awarded to a conductor, and the Gold Baton Award of the American Symphony Orchestra League.

Robert Shaw, in appreciation of your unparalleled musical artistry and in recognition of your unwavering devotion to our country's musical heritage, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Humorist, artist, and social critic, your remarkable talent for political satire has thrilled millions of Americans and jostled us out of our complacency. How skillfully you depict the foolhardiness that characterizes much of public policy and public life, and how eagerly we follow you day by day. Like another champion, you can float like a butterfly and sting like a bee, and as you puncture sham you puncture our consciousness and prompt us to think.

A graduate of Yale University, where you received B.A. and M.F.A. degrees, you launched your inimitable *Doonesbury* comic strip in 1970. Five years later you won the first Pulitzer Prize ever awarded a comic strip artist.

Today *Doonesbury* appears in more than 1,180 newspapers in the United States and abroad. Your durable characters have even starred in a network television special as well as in a Broadway musical. From 1984 to 1988, your stinging political review, *Rap Master Ronnie*, delighted audiences from New York to Washington, D.C.

Garry Trudeau, in recognition of your modern contributions to the venerable art of social and political satire, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Premier clinician and innovative researcher, you have been a leader in the application of what you have termed “the new genetics” to clinical medicine. You have elucidated the molecular basis of thalassemia, a hereditary form of anemia which is found frequently in populations bordering the Mediterranean and in Southeast Asia.

You came to Johns Hopkins for the first time as a research fellow in 1960, having just completed service in British military hospitals in Southeast Asia. There, you had become aware of the high frequency of thalassemia and chose to study hemoglobin and the abnormality present in thalassemia. You developed innovative methods of investigating the problem through the so-called messenger RNA. These methods were crucial in uncovering the nature of the basic defect and in working out ways of distinguishing the several forms of the disease.

Returning to England in 1965, you carried on your work as professor of hematology at the University of Liverpool. In 1974, you were appointed to the distinguished Nuffield Professorship of Clinical Medicine at the University of Oxford. There you more recently developed an outstanding research organization, the Institute of Molecular Medicine, of which you are honorary director.

You have provided distinguished service as a consultant to the World Health Organization and as a Trustee of the Wellcome Trust. In 1977, you became Fellow of the Royal Society of London and, in 1987, were knighted for your services to medicine. Last month, you were elected a foreign associate of the National Academy of Sciences.

Sir David Weatherall, in recognition of your extraordinary contributions to medicine, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Diplomat, lawyer, and business executive, you have pursued not just one but three careers, each with a record of achievement that alone would have satisfied anyone less accomplished and energetic than yourself.

In your chosen field of jurisprudence, you were a *summa cum laude* graduate of Cornell Law School, a lawyer in private practice in Rochester, New York, and, beginning in 1969, a partner, and now senior counsel, for the international law firm of Coudert Brothers. From 1955 to 1966, you pursued simultaneously an enormously successful business career that entailed service as vice president and general counsel, chairman of the executive committee, and chairman of the board of the Xerox Corporation.

Always interested and involved in humane and civic activities, you answered the call to public service from President Lyndon B. Johnson in 1966, when you were named U.S. Ambassador to the Organization of American States. In 1977 and 1978, you served another President, Jimmy Carter, as co-negotiator of the Panama Canal Treaties. From 1978 to 1979, you served as chairman of the Presidential Commission on World Hunger. And from 1979 to 1981, you served as the President's Personal Representative to the Middle East Negotiations.

Your hallmarks have been high intelligence, an unwavering sense of purpose in the advancement of international understanding, and a consistent sense of fair play. The Johns Hopkins University is one of an impressive number of organizations that have benefited from your wise counsel as Trustee. You have graced your manifold service with exceptional charm and wit.

Sol M. Linowitz, for your remarkable contributions to the cause of world peace no less than for your unstinting service on behalf of this institution, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

The University Mace

The University Mace carried by the Chief Marshal, Dr. Owen M. Phillips, was first used at the 1954 Commemoration Day Exercises. Eight symbols are hand wrought in sterling silver on an ebony staff. The symbols represent our cultural development from ancient times, through the Middle Ages and the Renaissance, to the modern era.

The Presidential Insignia

University President Steven Muller is wearing the Presidential Insignia signifying the authority vested in the President by the Board of Trustees. It is a chain of sterling silver links worn around the neck. Portraits of each of the ten Johns Hopkins University Presidents are engraved on the faces of ten of the links. On the reverse are engraved the names and dates of office of each President. Ten blank links for future use are included. The University Seal completes the design.

Academic Dress

The custom of wearing academic dress stems from the Middle Ages, when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth. The cap was originally round, but has changed to the varieties that we see today.

The gown varies for the respective degrees. The Bachelor's gown is worn closed and can be distinguished by its long, pointed sleeves. The Master's gown is designed to be open with the arms worn through the slits in the elbows of the sleeves. The Doctor's gown, also worn open, has full, bell-shaped sleeves with three horizontal bars stitched across the upper arm. There is a velvet panel draped around the neck and stitched down the front edges. This velvet trimming may be either black or the same color as the velvet border of the hood.

The hood also varies for the respective degrees. The Bachelor's and Master's hoods are of the same design, pointed at the base. The Bachelor's hood is three feet long; the Master's hood is three and one half feet long. The Doctor's hood is four feet long, of fuller shape and rounded at the base.

The hood is bordered with velvet, the color of which indicates the field of study in which the degree was earned:

Dark blue - Philosophy

Light blue - Education

Green - Medicine

Salmon pink - Public Health

Orange - Engineering

Gold-yellow - Science

White - Arts and Letters

Pink - Music

Purple - Laws

Apricot - Nursing

The silk lining of the hood represents the institution which granted the degree. If more than one degree is held, the gown and hood of the higher or highest degree is worn. The Johns Hopkins University has adopted an alternative costume to be used by all holding Johns Hopkins doctoral degrees, both earned and honorary. The costume consists of a gold robe with front and side panels in sable velvet and a six-sided Dutch academic cap with gold sweatband and tassel. The linings seen in today's academic procession may include:

Black, old gold chevron-Johns Hopkins	Carnegie Tartan - Carnegie-Mellon
Light blue, white chevron-Columbia	Purple-New York University
Dark blue-Yale	Bright red-Wisconsin
Blue with white chevron-Duke	Plum, with scarlet-London
Dark blue, two orange chevrons-Illinois	Maroon-Chicago
Light blue, two white chevrons-North Carolina	Crimson-Harvard
Old gold, maroon chevron-Minnesota	Carnelian, two white chevrons-Cornell
Old gold-Iowa	Cardinal-Stanford
Gold, blue chevron-University of California at Berkeley	Red, tri-Chevron in center-Heidelberg
Gold-Virginia	Dandelion yellow-Michigan
Purple, gold chevron-Northwestern	Maize, azure blue chevron-Sorbonne
	Yellow and white-Rochester

The University Motto

Veritas vos liberabit.

The truth shall make you free.
