A M Inntm:

CHANG... 

The Class of 1950 proudly presents the first Homewood Reunion Mini Alumni College. Our "Watch", the last half century of the second millennium, has been characterized by CHANGE. Today, the Class of 1950 examines CHANGE in our lives and the University through the lenses of JHU sports, a class conversation, and the Homewood Campus.

This is a "by us and for us" program. Members of the Class of 1950 are expected to actively participate in these sessions. Happily, there is no tuition, no exams, nor any assignments. Background information is available by link. The actual links are available from our class reunion home page — http://www.jhu.edu/-web50

Greetings to all our Hopkins Five-O Classmates!

The Class of 1950 was one of the largest classes of the early post-war period, and was diverse. It was comprised almost equally of veterans and traditional new high school graduates. Many of the vets were married and some even started families while pursuing their education. There were outstanding athletes, and non-athletes who were proud of our teams and cheered them on. All were serious about their studies and prospective careers. But we also were an active group with a variety of interests, and we enjoyed a lot of good times – fun times – together. In classes and in activities we melded together and formed lasting friendships and camaraderie.

Your Reunion Committee, formed in 1998, determined from the outset that this event would be “of the members” and “for the members”. It would be YOUR reunion. Your ideas and comments were solicited. Your preferences of options were determined. And a consensus was reached on the final decisions. Your interest and input guided the Committee in developing a program of events which will be a memorable experience.

But we were not a class “alone”. We developed a closeness with other classes. Because of this closeness the Committee has benefited significantly from the ‘49ers’ experiences. They very generously shared both their reunion planning and actual results with us. This yearbook is typical.

Warren Dederick and Bob Zadek, Co-Editors for the 1950 HULLABALOO, have also Co-Chaired the Reunion Yearbook. Just as that yearbook captured “the heartbreak, happiness, dreams and disillusion” of our senior year, this yearbook portrays the remembrances, happiness and accomplishments of the 50 years which have followed, as submitted by each of you.

In the early 1950’s our class established a student scholarship fund. Like the seas, there was an initial splash, and then a calming period – it has not grown much over the years. The Committee determined that this effort should be reinstated and that we should on this occasion perpetuate the memory of our 50th reunion by creating a class gift to the University. This gift will be used for undergraduate financial aid. Our goal has been set in the amount of $1,000,000. We will achieve this goal.

It has been a personal pleasure and enjoyment to work with the dedicated members of the Reunion Committee. Special recognition is due to the following chairmen: Justin Vitrano, Thursday and Friday night events; Charles Nicodemus, the Saturday night dinner; George Becker and Ross Macaulay, the Friday program; Robert Foster, the Memorial Service; Lloyd Bunting and George Becker, class gift; Harry Tighe, communications and attendance; Warren Dederick and Robert Zadek, yearbook

Enjoy YOUR 50th Reunion!

Walter E. (Woody) Woodford, Jr.
Chairman, 50th Reunion Committee
Greetings to the Class of 1950,

And welcome back. Let me be the first to congratulate you on the 50th anniversary of your graduation from Johns Hopkins!

It is a pleasure to welcome back to campus a class that was extraordinary in so many ways. When you arrived as freshman in 1946, the war was just ended. Japan, Germany, and much of Europe and Asia lay shattered. Many of you were veterans of that conflict—you were older, worldlier, with a stronger sense of purpose and goals than the typical freshman. Part of your college experience was spent in bridging the distance, as the 1950 Hullabaloo described it, between “the worldly vet and the high school wheel.”

That changed, however, over the course of your four years, as veterans made way for more traditional students just graduated from high school, while outside, World War gave way to Cold War. The seeming tranquility of the Homewood Campus was shattered when Senator Joseph McCarthy accused Hopkins professor Owen Lattimore of spying for the Soviets.

Even more profound was the change that may have slipped by all but unnoticed while you were here: television came to Baltimore. Those few of you who had access to a TV could watch the first educational show produced by a university, The Johns Hopkins Science Review.

You also witnessed the passing of one Hopkins era with the departure of president Isaiah Bowman, (who, it was rumored, could occasionally be seen joining in touch football games in front of the dorms), to the administration of Detlev Bronk, whose ready handshake, quiet smile and black Ford parked in the no parking zone became trademarks of a new day at Hopkins.

The Class of 1950 was by far the biggest, and according to some, the most fun-loving class to have passed through Hopkins in the first half of the century. There was the dance at Keith’s Roof in Junior year. There was a
week of festivities preceding the day when some 500 of you received diplomas. And of course, there was lacrosse, a venerable Hopkins tradition burnished to new brilliance during your time here. You witnessed four straight undefeated seasons, intercollegiate championships, and coming within a single goal of winning the National Open Crown--all led by the great "ten commandos" who were your classmates.

Much has changed in 50 years. The Student Council debates in building boom and now additional women study on campus, medicine.

You didn’t have remained medicine. Your goal will be like Hopkins in the mission.

On the occasion of our GOLDEN ANNIVERSARY REUNION

The Garrett Room
Milton S. Eisenhower Library
Homewood Campus
April 28, 2000
11:00 a.m.
Greetings to the Class And welcome back. Let me begin with the anniversary of your graduation.

It is a pleasure to welcome you back in so many ways. When World War II ended, Japan, Germany, and Italy surrendered, each of you were veterans of the war. You, more than any other group of students in your college experience, have a stronger sense of purpose. Even as the war ended, Hullabaloo described it as a "madcap wheel."

That changed, however, and once the war was won, the links of life were made way for more tranquil pursuits. While outside, World War II was raging, on the Homewood Campus, Hopkins professor Owen used his faculty car, a black Ford parked in the Homewood Campus parking lot, to drive students to lectures.

Even more profound were the experiences of those who had access to the Hopkins, a university, The John Hopkins University.

You also witnessed the destruction of the campus caused by President Eisenhower, in 1945, when the administration of DetlevО. O. O. W. Hullabaloo described it as a "madcap wheel."

The Class of 1950 was a very special group, a very special fun-loving class to have lived in the second half of the 20th century. There was the A SERVICE OF REMEMBRANCE Piano Prelude  Bach, “Prelude in C”  Mrs. Frances Vitrano A RESPONSIVE PRAYER OF REMEMBRANCE Rev. Bob Foster, Leader Everliving God, this day revives in us memories of beloved classmates who are no longer with us. What happiness we shared when they walked among us. What joy, when we lived our lives together. Their memory is a blessing. Months or years may have passed, and still we feel near to them. Our hearts yearn for them. The links of life are broken, but the links of love and tribute cannot break. Their souls are bound up in ours forever. Faithful, Merciful God, we remember them with gratitude and lift their names in your presence. Their memory is a blessing. Amen SCRIPTURE READING Rabbi Nathan Abramowitz 23rd Psalm Chanted in Hebrew followed in unison in English The Lord is my shepherd; I shall not want. He maketh me to lie down in green pastures; He leadeth me beside still waters. He restoreth my soul; He guideth me in straight paths for His name’s sake. Yea, though I walk through the valley of the shadow of death, I will fear no evil, for Thou art with me; Thy rod and Thy staff, they comfort me. Thou preparest a table before me in the presence of mine enemies; Thou hast anointed my head with oil; my cup runneth over. Surely goodness and mercy shall follow me all the days of my life; and I shall dwell in the house of the Lord for ever.
week of festivities preceding the day when some 500 of you received diplomas. And of course, there was lacrosse, a venerable Hopkins tradition burnished to new brilliance during your time here. You witnessed four straight undefeated seasons, intercollegiate championships, and coming within a single goal of winning the National Open Crown--all led by the great “ten commandos” who were your classmates.

Much has changed in 50 years. The Student Council no longer debates in the building boom that has added a new Student Union and campus. The women study in a new Student House. And the course of study has turned to medicine.

Myron M. will be among them, as will be like them. Your goal will be like their goal. And of course, Hopkins in Baltimore and beyond will be the same. A constant mission.

A constant mission. And of course, Hopkins in Baltimore and beyond will be like them. Your goal will be like their goal. And of course, Hopkins in Baltimore and beyond will be the same. A constant mission.

Every effort has been made to make this list as accurate as possible. If someone has been overlooked, please notify the Office of Alumni Relations at 410.516.0363, or 800.JHU.888 (548.5481).
Greetings to the Class

And welcome back. Let me begin on the 50th anniversary of your graduation:

It is a pleasure to welcome you back to Hopkins in so many ways. When I was a student here, the Korean War ended. Japan, Germany, and Korea were in the news. Many of you were veterans of World War II and had a stronger sense of purpose about your college experience. Hullabaloo described it as "the wheel."

That changed, however. The advent of the Cold War made way for more traditional activities. While outside, World War II veterans filled the Homewood Campus. Hopkins professor Owe... (Note: the text is obscured from this point forward.)

Even more profound were the changes unnoticed while you were here. Even for you who had access to a university, The Johns Hopkins was a unique place.

You also witnessed the beginning of the Cold War. President Isaiah Bowman was neighbors with President Eisenhower, and in the 1950s, mythologies of football helped to join in touch football and the administration of Detlev and the black Ford parked in the driveway of Hopkins.

The Class of 1950 was a fun-loving class to have during the middle of the 20th century. There was the...
week of festivities preceding the day when some 500 of you received diplomas. And of course, there was lacrosse, a venerable Hopkins tradition burnished to new brilliance during your time here. You witnessed four straight undefeated seasons, intercollegiate championships, and coming within a single goal of winning the National Open Crown—all led by the great “ten commandos” who were your classmates.

Much has changed in 50 years. The Student Council debates in building boom and a new Student new additional buildings on campus, women study medicine.

The Lord bless you and keep you; The Lord make his face to shine upon you, and be gracious unto you; The Lord lift up his countenance upon you, and give you peace. Amen (Numbers 6:24-26)

Piano Postlude Handel, “Largo” Mrs. Frances Vitrano
Greetings to the Class

And welcome back. Let your 50th anniversary of your graduation with us begin. It is a pleasure to welcome you in so many ways. Whether you were veterans of the Homewood Campus, or perhaps you were the first generation to graduate in the Homewood Campus, the Hopkins professor Owen Hullabaloo described it this way: “The Homewood Campus was a wheel.”

That changed, however, and then, you made way for more tradition. Even more profound was the change, unnoticed while you were here, and you who had access to Hopkins by a university, The Johns Hopkins University of Baltimore, MD. You also witnessed the inauguration of president Isaiah Bowman, joining in touch football games with the administration of Detlev Van Doren, and black Ford parked in the Homewood parking lot.

The Class of 1950 was a fun-loving class to have in your century. There was the celebration of the 1940s and the 1950s in the society and the social life of the school. You witnessed the end of World War II and the beginning of the Cold War. You were veterans of the Homewood Campus, and you were the first generation to graduate from the Homewood Campus.

The Johns Hopkins University
1-800-JHU-JHAA (548-5422)
week of festivities preceding the day when some 500 of you received diplomas. And of course, there was lacrosse, a venerable Hopkins tradition burnished to new brilliance during your time here. You witnessed four straight undefeated seasons, intercollegiate championships, and coming within a single goal of winning the National Open Crown—all led by the great “ten commandos” who were your classmates.

Much has changed in 50 years. The Student Council no longer debates in smoke-filled rooms in the basement of Levering. A veritable building boom at Homewood has added some two dozen buildings, including a new Student Arts Center, now under construction, as well as important new additional buildings, planned for the near future. Today, undergraduate women study alongside men, very few of whom wear ties. Ethnic minorities on campus, when taken together, now constitute a majority.

Yet much remains the same: undergraduate independence and self-sufficiency, seriousness punctuated with frivolity, and the inevitable assumption that all Hopkins students are studying medicine.

The Class of 1950 was exceptional when it graduated and remains so to this day. In the half century since your departure you have journeyed to the four corners of the earth and accomplished much in science and medicine, business and commerce, and many other fields besides. You didn’t actually leave Homewood behind, though, and we are glad. You have remained an active and engaged class, as is obvious from this well-planned reunion. And you are generous. We are deeply grateful to you for your commitment to providing significant support to the Institution. Your goal of $1 million is commendable and indicates the deep gratitude that you have for Hopkins.

We don’t know what future generations of Hopkins students will be like and what they will do, though we can be sure, like you, they will be among the very best and brightest students anywhere. Your faith in Hopkins in making an extraordinary gift to the university says you know the importance of what we do, and want to share in this important mission. Thank you for your gift, your vision, and your trust.

In the spirit of the Class of 1950, may you enjoy your reunion to the fullest!

Sincerely,

William R. Brody
On the Side of the Line: Reflections After Fifty Years

When he was editing the 1949 Hullabaloo and at the same time educating the staff warming up to succeed him as bards of our 1950 yearbook, Pax Davis introduced and championed a theme to give the book depth and unity. The Hopkins, Davis declared, was a school of paradox, a place of contradictions and irony. He defined this idea with a series of vivid images: “Crewcuts or Long-hairs?... Penguins or Plato?.... Boosters or Brahmins?... Caffeine or Morphine?... College or Country-club?” By this dictum our varsity football team was presented under the lapidary phrase, “Seeds for the Tangerine Bowl”, and the varsity basketball season dismissed as “Onions for the Salad Bowl”. When he -- we-- got around to our lacrosse team, we’d run out of paradoxes and ironies. The best we could do was summarize the philosophy of the Hopkins athletic program as tribute to the anomaly of our school producing a perennial national champion—“Emphasis on De-Emphasis”. Warren Dederick and Robert Zadek, who inherited the Davis legacy, defined their mission as distinct and perhaps lacking “the vitriolic wit of the Davis regime”. They were committed to “the humble and relatively unromantic task of publishing a yearbook that would please its subscribers”. They were rewarded fifty years later by being asked to edit a digest for our class reunion.

When I checked into Homewood, Fall 1946, among my strongest links to the Hopkins was Fred Smith, Jr., the son of our family pediatrician. As I was growing up in the thirties, Freddie was a legendary figure to me. Between sessions with the tongue depressor, I heard about Fred Jr.’s affinity for lacrosse. Because the Hopkins of our era was such an informal social campus it was possible for a News-Letter skeptic to mix easily with an athletic hero. I recall Freddie’s modest shrugs when I praised him, and his insistence that any midfielder could look good with Bunting, Sandell, Adams, Kalus, Bishop, Fewster, Gough and Shepard on his side. Of course he referred to them all by first names and their identities were a mystery to me, but not for long. It’s hard to believe Freddie isn’t still streaking up the field, stealing a pass, cradling as he closes in on the crease. I have to get used to the idea, too, that Jim Donnelly won’t be with us. I guess I’ll never get to know if he, as so many campus liberals of our generation, tempered his passionate confidence in the innocence of Alger Hiss but continued to believe in the integrity of our Owen Lattimore.

When we teased about our futures during June Week, 1950, I considered the versatile Adonis, Ham Bishop, physician-to-be Robby Baker or the disciplined scholar Gene Schreiber as my candidates for most likely to succeed. Eventually I concluded Mort Blaustein was the odds on favorite. Mort, a doer of good deeds with fierce loyalties to the institutions and ideas in which he believed, was the heir to an oil empire that he didn’t take for granted. (Did I hear him right? Was he actually majoring in geology?) I lost touch with Mort, but I did read from time to time of his family’s generosity to J.H.U. I was stunned to learn recently that he died years ago by choking to death in a restaurant. The Reaper provides somber antidotes to sentimental nostalgia at half century reunions.

New York, where I went into exile after leaving Bawlamer, is a no less than a bilingual town. It may be some indication of my failure to fully appreciate the values of Don Pedro Salinas’s classes that I recently coughed up forty-five bucks for a CD that promises to teach me “Spanish -in-a-Hurry”. This venture in continuing education reminded me that Chase Ridgely, Ernie Hansen, and Ed Blazek were my peers, poco a poco, circa 1947. We didn’t know that our earnest classmate who fulfilled all assignments, muy bien, gracias, was destined to become Judge Robert Hammerman, Levering Hall was a two tier, two culture institution during my News-Letter days. The basement scribblers of the campus publications, including the Hullabaloo and later The Jaywalker shared frugal space and one john with members of the Student Council and SAC who dropped in from time to time to validate credits for their medical school applications—so we thought. It required five decades for this crack-reporter to learn from class archivist Dr. George Becker that cynics of the fourth estate were not entirely wrong. Meanwhile, upstairs, the serious business of the Y.M.C.A. Cabinet was being conducted by Bob Foster in collaboration with “Reverend” Len...
Foster in collaboration with "Reverend" Len Detweiler, Gordon Betz and a board whose photograph appears in the yearbook with two members in ROTC cadet uniforms. I wonder--did they both survive the Korean War and Viet Nam?

After Russ Baker left the News-Letter to join the Baltimore Sun, all I wanted to do was publish an edition that would impress him. We finally hit the jackpot with our April Fool's parody of the Sun in 1949. We called it The Eclipse. Yardley, the Sun’s editorial cartoonist, was sufficiently impressed to compose a special drawing for us. Russ was pleased. Last year when he received the George Polk Career Award, we discussed the issue with Phil Hamburger, the New Yorker writer and former editor of The Blue Jay. I was sure I had a copy to show-off. I didn’t. I wonder if Jack Marek or Bill Hevell, the muses who kept the copy flowing in those days, will show up at our 50th and remember.

It’s a cinch Hal Sonnenfeldt will not recall introducing me to pizza, New Year’s Eve, 1949. He was already a man of the world and as familiar with our Little Italy as he was with Eastern European politics. I ventured no further from hot dogs and corned beef sandwiches than Maryland fried chicken (Oriole Cafeteria) and crab cakes (Miller Brothers). The only pies I trusted were apple, pecan and chicken pot. But Helmut insisted a pizza was a rite-of-passage. The tradition he introduced me to lives on: Friday afternoons, Mimi’s, 84th and Lexington, New York City, where I lunch with one of my granddaughters. Hal of course, went on to a distinguished career of foreign service. At a party for his editor Henry Kissinger, Hal’s former colleague, told me recently, "Nothing I ever did pleased Hal. No matter how hard I tried". An amusing overstatement that, perhaps, only News-Letter cronies of the Bowman-Bronk era can appreciate.

When I met Len Scheer in the locker room of Homewood Field, he was introduced to me as a world class track star, 100 yard dash champion, ETO. Len joined Leon Schwartz, Earl Grim and Bill Andrae, among others, to represent Hopkins in varsity competition. I didn’t follow the fortunes of the team closely, but I know Len left Homewood with medals and trophies to add to his collection of schoolboy and service awards. Len lives in our neighborhood and he’s been my pal for fifty years. We’re all up there in our eighth decade these days (70 and rising). I guess if the stakes were high enough, Lloyd Bunting could put together ten old men to make a run for a senior title. Maybe. The indomitable Quint Langstaff will never be too old to take on competition that he deems threatening to truth, justice or the Johnny Hopkins way. I don’t know about you, but I’m satisfied to hike a little with my wife on holidays. Our classmate, the former ETO champ, is still at it. Last month Len journeyed to Orlando and won first place in a senior speed walking race that attracted over two hundred competitors. His children have run out of space to store the medals he’s collected and Len’s still filing entry forms for competitions throughout the country. There must be a paradox-irony-- there somewhere. I’ll be sure to ask Pax Davis next time I see him.

Sidney Offit
...to me as a chess champion. Earl Grim and I met Ernest Hopkins in up the fortunes of the Homewood high school collection of men lives in our palace for fifty years. The decade these days were high together ten in little. Maybe. There never be too old seems threatening a Hopkins way. I said to him a little classmate, the first month. Let first place in a run over two hundred for fifteen years out of your and let's oil runs throughout the site-irony-then in Davis tent tent...

William served as a paratrooper in the 82nd Airborne Division, earning a Bronze Star, the Purple Heart, and three battle stars before coming to Hopkins. He joined Sears Roebuck and Co. in 1950, and held numerous managerial positions in their retail stores in the northeast, becoming general manager of the Baltimore-Washington area stores in 1974. He became general manager of the Greater New York area stores in 1977, and in 1979 became Executive Vice President-East. In 1982 he moved to Chicago as Senior Vice-President, Field with responsibility for the company's retail and catalog programs. He was elected Chairman and Chief Executive Officer in 1984, and was also a director of Sears Canada Inc. and of the Sears-Roebuck Foundation. He retired in December 1986, and looks forward to visiting his children and grandchildren.

Married Alice Both 3 children 1 grandchild

After medical school (at Hahnemann) and the Navy (internship and Formosa) came five years of residency between Yale and a London wanderjahr. Until 1990, George was in private practice; he still holds a part-time academic appointment at the New York Neurological Institute. Early on, mainly to fill the gap left by his first wife’s premature demise, George spent his personal time on medical organizations, the History of Medicine Library at Yale (Trustee of the Associates), the Congress of Neurological Surgeons (Vice President) and the New Jersey Neurosurgical Society (President).

Life got immeasurably better when he married an intensive care nurse (see above). Their son David produced the class of 1950 web page: it is JHU’s first.

After his retirement, P&S gave George a distinguished alumni award, and he has served on JHU’s N.Y. Chapter Board and the alumni council for a few terms each. His favorite leisure pursuits are hiking, cross-country skiing, and genealogy.

After graduation, Dick became a securities analyst, and in 1954 he joined Provident National Bank in Philadelphia. He became head of the investment department in 1965, making the company a top provider of research to other institutional investors. He started the first bank-advised investment company, the first institutional money market, and a discount brokerage firm owned by a group of banks. He was most proud of being on the Board of Trustees of Hopkins, where a scholarship has been endowed in his honor. He was an orchid grower, an avid bibliophile, collecting first editions, a lover of music and an excellent pianist.

Following graduation from Johns Hopkins School of Medicine, John spent two years at Boston Children’s Hospital, then two further years of residency at Columbia-Presbyterian Babies Hospital in NYC. After a year of private practice in Fairfield, CT, he decided that academic pediatrics was what he really wanted to do. In roughly five year periods, John was at The Mayo Clinic; chaired a department in a community hospital in New Haven, CT; and was on the faculty at Yale. He accepted a dedicated chair in Community Pediatrics at SUNY Buffalo; he was head of ambulatory pediatrics at University of California, San Francisco; was Chair at Auckland New Zealand for eight years; he returned to Columbia on a sabbatical and remained there as vice-chair until retirement in 1993. He moved to the coast of southern Oregon and shortly thereafter engaged in a series of locum tenens including a winter in Moscow. After a career in the pursuit of power with numerous awards along the way, John concluded that his greatest satisfaction came from clinical contacts with children and their families.

Donald T. Fritz
History
Deceased July 2, 1997
Married Patience Linker 2 children 4 grandchildren

Don had been looking forward to his JHU 50th reunion. For over 30 years he owned and managed J.T.Fritz and Sons, Inc., an industrial chain link fence company. The company won numerous sales awards and Don served a term as National President of the Page Fence Association. Don was active in the Associated Builders and Contractors, Inc. where he chaired several committees, served as National Vice President on the Board of Directors and was honored by being awarded Lifetime Membership. Don served as President of St. Paul's School Alumni Association, and of the Board of Trustees of St. Paul's School for Girls. In retirement he worked as a professional tour guide and wrote "A Walking Tour of Historic and Renaissance Baltimore", the first real guide book to the City of Baltimore. He also served as Archivist at the Lacrosse Foundation and as Senior Associate Editor of "Lacrosse Magazine". Don collected Civil War relics, U.S. postage stamps and played golf, followed lacrosse (JHU in particular) and travelled in Europe.

After a year of graduate work following graduation, Richard joined the Atomic Energy Commission to work on instrumentation development. He returned to school, now UCLA@Berkeley, for three more years of graduate work. In 1957 he founded Metrol, Inc. which developed and manufactured specialized industrial instrumentation. This was followed by the founding of Microwave Instruments Company (MIC) which developed and manufactured new types of industrial instrumentation for on-line testing. In 1968 Richard changed his professional focus to gerontology. He returned to UC@Irvine, to study the effects of life style and pharmacological factors on human aging. Following the sale of MIC, Richard set about developing H-SCAN, instrumentation to define the biological (as opposed to chronological) age of individuals and groups. His current enterprise, Hoch Company, in Corona Del Mar, CA, continues the development of H-SCAN.

Morton E. Kalus
P.O. Box 525
Brooklandville, MD 21022
History
Married Denny Hamburger 2 children

Mort spent 40 years as a builder and developer producing shopping centers, office buildings, and other commercial and industrial properties. He was a licensed real estate broker in the State of Maryland and a long time member of the National Association of Shopping Centers. He retired following the sale of his business in 1990. Having played lacrosse 8 years for the Mount Washington Club following graduation, Mort is now content playing tennis 6-7 times a week and golf 2-3 times a week. Retirement finds him dividing his time between Brooklandville, Maryland, and Boca Raton, Florida.

Deceased

Harry N. Keller
4803 Bowood Street
Center Valley, PA 18034
610-797-6680
Electrical Engineering
Married Jeanne W. Lloyd 3 children 5 grandchildren

Upon attaining his doctoral degree in chemical engineering, Harry began a 33-year career with Bell Telephone Laboratories, located at Murray Hill and Whippany, New Jersey, and in Allentown, Pennsylvania. There he investigated new materials for applications in thin film integrated circuits until 1988 when he retired to a less hectic lifestyle involving activities such as home maintenance and family visits. Harry and his wife have especially enjoyed taking numerous motorhome trips, sometimes with their children and grandchildren. One particularly coveted event is their annual family rendezvous in Myrtle Beach, SC. Besides travel, Harry's favorite hobby is photography with 35mm camera and video camcorder to preserve the many fond memories he has from his days at Homewood to the present.

Married Gloria Lerro 2 children 3 grandchildren

After attaining his M.D. degree, he interned at Mercer Hospital in Trenton for one year and then enlisted in the Public Health Service where he was involved in occupational health as well as radiation surveys relating to atomic testing in Nevada. Leaving the Public Health Service in 1957, William settled in New Jersey, joining the State Occupational Health Program, and began to establish a private medical practice. As the practice grew, he phased out of the state job and continued as GP until 1968. He then contracted with Mercer Hospital to work full-time in the Emergency Room and to develop a department staffed by qualified physicians instead of interns. He also became involved in developing the hospital’s Employee Health Service. William continued working in the Emergency Department for 25 years and with Employee Health an additional five years. Over the years, the Kresslers have found special pleasure in traveling, something they will do even more now that he is retired. He also does volunteer work for their church and with Habitat for Humanity.

Married Edith Bennett 3 children 2 grandchildren

After graduation, Art was a visiting professor at Dartmouth College for a brief time, but has spent the rest of his career as a research geophysicist with the U.S. Geological Survey working on a range of thermal and mechanical problems in permafrost, climate change, earthquakes and plate tectonics. It has been much fun for him. He was elected to the U.S. National Academy of Sciences in 1975. During this time, Art spent 20 years as a community planning commissioner, mainly on geotechnical issues of development and the environment. He is semi-retired from the USGS, and Edie is retired from her nursing career. They are currently tending a redwood forest that they acquired from a bankrupt logging company.

Gene isn’t sure whether his life was rich and rewarding, but he claims to have had a lot of fun. As a construction management engineer with all three military services, Gene kept following the best business opportunities until his retirement on his 55th birthday. He immediately enrolled in a doctoral level program in economics at George Mason University. After a few years, Gene entered the political trenches as a Republican, county committeeman, and precinct captain. There was never a dull moment as in Virginia they have an election every year. He bailed out of politics altogether during the George Bush administration. Now Gene travels about 20 weeks out of the year, plays bridge (life master), and watches as the world goes to hell (his assessment).

After spending two years in the Army as a counterintelligence agent in Germany, Bob attended graduate school at the University of Iowa, where he got his Ph.D. in English in 1956. He taught at Miami University in Ohio, Utah State University, Michigan State University, and from 1964 to 1966, was advisor in English and acting head of the English Department at the University of Nigeria, Nsukka, where he founded the University of Nigeria Press. For eight summers, he was a park ranger, first at Mt. Rainier, then for seven years as ranger/historian at the Great Smoky Mountains National Park at Cherokee, NC. He and his wife collaborate as drama critics for the Claremont Courier. He was Chairman of the Board of Directors of the Playhouse and has acted in several dozen plays. Now that he is semi-retired, he has found time to put on a demonstration of swordplay for Cal Poly’s Regenerative Studies students. Bob has three more chapters in books forthcoming and three more papers accepted for scholarly conferences and wonders when he will begin to feel really retired.

Hal received his masters degree at Hopkins in 1951. He then spent a year at SAIS, which had just become part of Hopkins, doing concentrated Soviet area and Russian language studies. This led to a job in the State Department’s Soviet and East European research office. Hal stayed in the State Department through the fifties and sixties, eventually becoming the Director of the Soviet/East European research office. At the start of the Nixon administration Hal moved to the National Security Council staff in the White House as the senior staff member responsible for East-West relations, US-European relations and NATO. He took these responsibilities with him back to the State Department in 1974 when Henry Kissinger became Secretary of State. Hal retired as a Career Minister in the Foreign Service in 1977 to begin a private life of consulting, teaching, writing and lecturing on international affairs. Hal is a director of the Atlantic Council of the U.S., of the World Affairs Council of Washington, D.C., the JHU-affiliated American Institute of Contemporary German Studies, and the Leo Baeck Institute in New York. Over the years he has served on the boards of several other organizations dealing with diverse international issues and U.S. foreign and security policy. Hal has received a number of awards from the U.S. government and from various foreign governments, including France, Germany, Sweden and Luxembourg. While still in government service Hal became a Trustee of Hopkins and has continued in that capacity (now emeritus). Other Hopkins connections have included serving on the part-time faculty at SAIS, and the school’s advisory committee, editing an early version of the SAIS Review and as the SAIS alumni president.

Electrical Engineering
Married Rita Edwards 2 children 1 grandchild

Roland spent thirty-five years at General Electric working on aerospace projects. During his last eight years there he created and implemented decision technology and quantitative assurance methodology. Roland has used assurance science to affect national military and domestic policies. His work has led to many inventions plus an approach to mitigating human health problems, and extending life. Roland initiated two books - "Making Decisions Based on Assurance" and "Human Being Instruction Manual".

Married Elizabeth (Betty) Gannon 2 children 4 grandchildren

After Hopkins, Woody became a construction project engineer with the Maryland State Roads Commission and ultimately became Chief Engineer and Deputy Highway Administrator. He had responsibility for major freeway, bridge and tunnel projects in Maryland. Woody chaired/served on a number of committees of the American Association of State Highway Officials and the Highway Research Board, and on many special State committees and task forces. In 1973 Woody joined The Rouse Company as Director of Engineering for Office and Community Development, and was a Vice President of both The Rouse Company and its subsidiary for Columbia, The Howard Research and Development Corporation. In addition to the new city of Columbia, he was involved in projects in Baltimore City, Buffalo, Wilmington NC, and Baltimore County. Woody has served on the Maryland Transportation Professional Services Selection Board, is a member of the Maryland Transportation Authority, and is chairman of the board of the Canton Railroad Company. He is a registered Professional Engineer and Professional Land Surveyor. Woody is a Fellow and a Life Member of the American Society of Civil Engineers, and a past member of the National Board of Directors. He has chaired/served on many ASCE national committees. Woody was presented the Maryland Section’s 1986 Award for Meritorious Service to the Civil Engineering Profession. He was chairman of the Advisory Committee to the Civil Engineering Department of the JHU. Woody has been a leader in local planning and zoning, economic development, residential and commercial development, church, Rotary, fire company, historical, social, and fraternal organizations. He enjoys lacrosse, hydroplane boat races, hunting, fishing and travel.

Industrial Engineering
Married Barbara McClave 4 children 5 grandchildren

Bob came to Hopkins after graduating from Brooklyn Technical High School. He was the recipient of an engineering scholarship after his freshman year, and graduated with honors. He was drafted into the U.S. Army, and was sent to O.C.S., graduating with honors. His commission was in ordinance. He spent a year at the Ordinance Guided Missile Training School, and led the Internal Guidance Branch of the Army Ordinance Missile School. He declined a regular-army commission, returning to civilian life and the industrial applications of digital computers. He became Director of Marketing for the Hewlett Packard Computer Division. In 1982 he founded Integrated Marketing International (IMI), which provides marketing, publicity and promotional services to advanced-technology companies worldwide. He has authored numerous articles describing the use of advanced technology in industrial plants. Bob has been active in his church, serving as Deacon and Trustee. He was on the board of the Family and Children’s Agency, devoted to the placement of adoptive children. In prior years an avid sailor, he and Barbara have become power boaters, and spend their winters on their boat in Jupiter, FL.
