My dear Sir:-

Yours of the 4th inst received and noted.

You omitted to make any enclosures in your letter and therefore I do not comprehend the trend of what you have in hand.

Before I overlook it, please make correction in the name of Mr. Young; you have it Carroll Young, it is Calvin Young.

I will be more than glad to aid you in the "public service." Please send me the papers that I may know just what you want to accomplish and then I can give you better suggestions.

Prof. Thurston, goes without saying, is without a rival, almost without an equal in the country.

Mr. Calvin Young is a splendid practical mechanic; honest and faithful as the day is long.

H. C. Wheeler is from the State of Iowa; was nominated by the Republican party for Governor a few years ago, but failed the election.

Chas. Whitney, inventor and expert mechanic of Chicago has spent the last twenty years or more of his life in the field of agricultural implements.

After I hear from you again I may be of service to you,

Established 1842.
